Hazardous Weather

Thunderstorm Potential Today

Weather Forecast Office
Amarillo, TX

Timing of thunderstorms will start this afternoon into the evening hours

Issued Jun 25, 2019 5:37 AM CDT

Hazards:

- Large hail up to 2" in diameter
- Winds gusts up to 60 MPH
- Isolated tornado

Please check back for updates to the forecast this afternoon

f t NWSAmarillo

weather.gov/ama

We are watching the area from a line near Adrian northeastward to Beaver and points east for thunderstorm potential this afternoon into the evening hours. With the help from a surface trough and a mid level disturbance, if we can break the cap, some thunderstorms could be severe with large hail, damaging winds and even an isolated tornado all possible today. Please stay weather aware.

Isolated to scattered thunderstorms may form over the area this afternoon or evening. The more intense storms pose a marginal risk of becoming severe with large hail, damaging wind gusts and localized very heavy rainfall.

Hazardous Weather

Today: High temperatures in the upper 80s with a few scattered afternoon thunderstorms expected. Partly cloudy with south winds at 5-10 mph.

The area is behind average for number of 100 degree days. We might get one closer to what's normal on Tuesday as a few lowland spots will likely see a triple-digit afternoon. Also, we are beginning to see a shift in the pattern that will break this long dry spell, and begin to allow moisture to move into the region from the east. Far eastern areas will see more clouds and a few storms, while most of the area remains dry at least one more day. Going on into mid and late week, that moisture should continue it's westward march allowing most of the area to see mostly isolated daily showers and thunderstorms.

Hazardous Weather

Tuesday

Scattered Showers & Thunderstorms Possible This Afternoon

Weather Forecast Office
Fort Worth, TX
Issued Jun 25, 2019 4:13 AM CDT

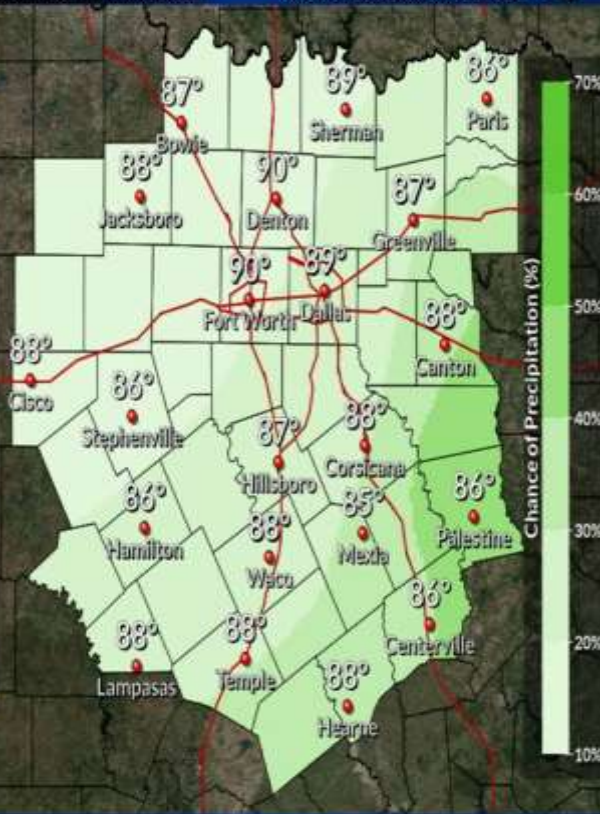

SCATTERED

The morning hours should be quiet, but another round of scattered showers and thunderstorms will be possible this afternoon and evening. The best chances will be mainly along and east of I-35.

Any strong to severe thunderstorms will have a risk of hail and gusty winds.

Afternoon highs will range from the upper 80s to low 90s.

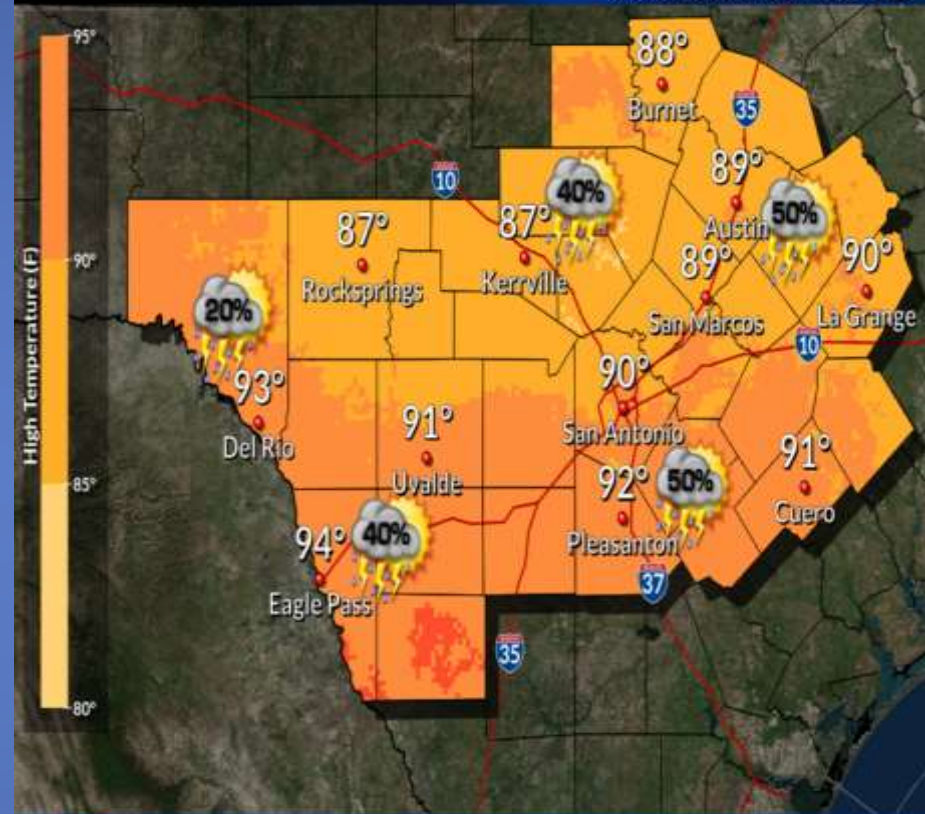

NWSFort Worth

weather.gov/fortworth

Another round of scattered showers and thunderstorms will be possible this afternoon and evening. The best chances will be mainly along and east of I-35. Any strong to severe thunderstorms will have a risk of hail and gusty winds. Afternoon highs will range from the upper 80s to low 90s.

Scattered Showers & Storms

Weather Forecast Office
Austin/San Antonio, TX
Issued Jun 25, 2019 4:21 AM CDT

NWSSanAntonio

weather.gov/ewx

Elevated rain chances continue today as moisture remains abundant over the region. A few storms could produce locally heavy rainfall amounts of 1 to 2 inches, and there is a potential for a few strong storms and damaging wind gusts across areas east of I-35. Afternoon highs are expected to be a few degrees below late June normals.

Hazardous Weather

Severe Weather Outlook for Southeast TX

Marginal Risk Tuesday Morning through Wednesday Morning

Weather Forecast Office
Houston/Galveston, TX
Issued June 25, 2019 5:55 AM CT

WHAT

Marginal Risk Area (dark green) – damaging winds, hail, lightning.

WHERE

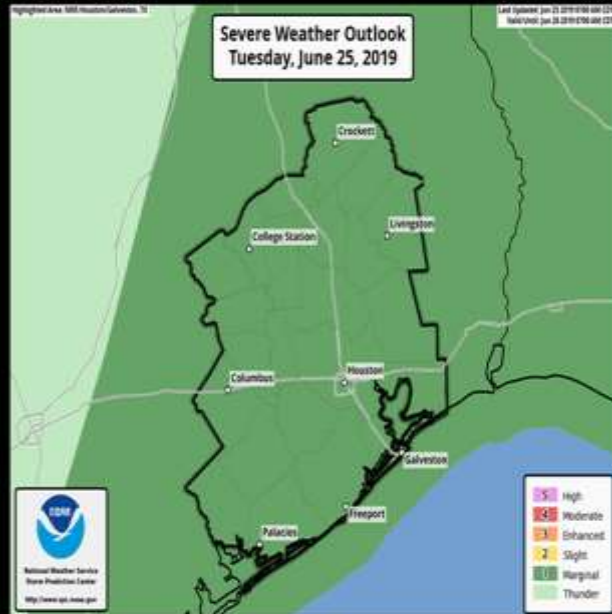

Southeast Texas, local bays and nearshore Gulf waters.

WHEN

This Morning through Wednesday Morning (7AM-7AM).
Showers and thunderstorms will be moving across the region Tuesday as an upper level trough moves eastward. These showers and storms could produce gusty damaging winds, hail and frequent lightning.

ACTION

Monitor forecasts for severe weather watches and warnings. Have plans to take shelter before warnings are issued. **Have multiple ways to receive warning information.**

Understanding Severe Thunderstorm Risk Categories

THUNDERSTORMS (no label)	1 - MARGINAL (MRGL)	2 - SLIGHT (SLGT)	3 - ENHANCED (ENH)	4 - MODERATE (MOD)	5 - HIGH (HIGH)
No severe* thunderstorms expected	Isolated severe thunderstorms possible	Scattered severe storms possible	Numerous severe storms possible	Widespread severe storms likely	Widespread severe storms expected

f t v @NWSHouston

weather.gov/hgx

Marginal risk of severe thunderstorms expected today through Wednesday morning.

Rain Chances Continue Today

Showers and thunderstorms today with southeast winds.

Weather Forecast Office
Corpus Christi, TX
Issued Jun 25, 2019 4:28 AM CDT

f t v NWSCorpus

weather.gov/crp

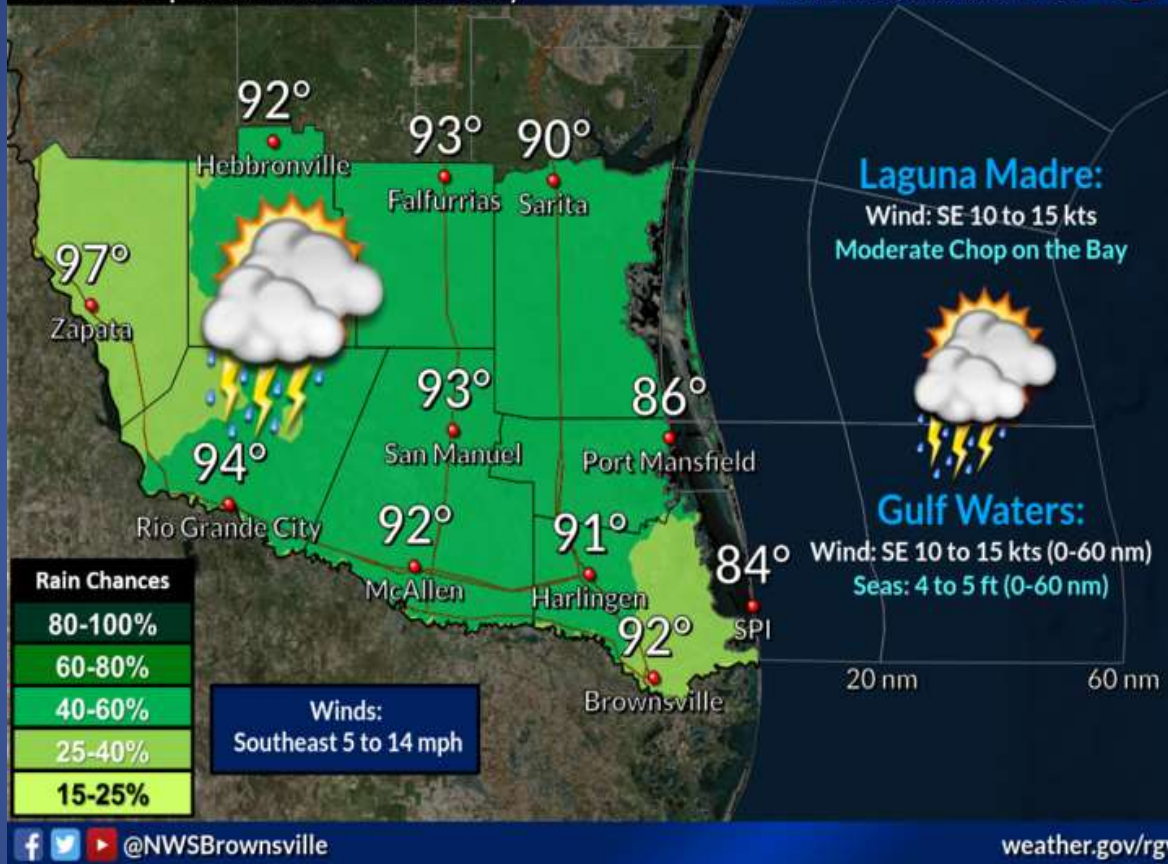

Warm today across South Texas, with maximum Heat Index values 100 to 105F. Scattered showers and thunderstorms across the Coastal Waters this morning spreading inland through the day. Small Craft Advisory early this morning for the Coastal Waters, with conditions improving late this morning.

Hazardous Weather

Today | High Temps & Rain Chances

Heat Indices Up to 107 in the Rio Grande Valley

Weather Forecast Office
Brownsville/RGV, TX
Issued Jun 25, 2019 5:24 AM CDT

Today we finally break the trend of extreme heat! The peak indices will still reach 107 degrees in some areas of the Rio Grande Valley, so don't forget to practice heat safety if spending time outside today. After the storm system that passed through the Rio Grande Valley overnight last night, many areas are completely saturated and there are several reports of flooding. Stay safe and don't drive into standing water. As there is still a chance of rain again today the potential for additional flooding exists across eastern portions of Hidalgo county into western portions of Cameron and Willacy counties.

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
06/24/19	Flood Warning	Chambers Creek Near Rice affecting Navarro County; Neches River at Neches River Saltwater Barrier affecting Jefferson County; Trinity River Near Long Lake (Oakwood) affecting Anderson, Freestone and Leon Counties
